

# Forest investments in the Baltics

## Field trip – Latvia and Estonia

### 20-22 September

If you consider investing in forestry, the opportunities in the Baltics are good. Here, the price of an acre of forest is considerably lower than in Northern Europe. Forest investment in the Baltics provides a long-term and stable return and the risk is low. The well-developed infrastructure also ensures access to the global market. The Baltic forest industry is characterised by state-of-the-art sawmills and veneer factories, exporting globally. Travel with us to Latvia and Estonia to experience the opportunities:

### Agenda (preliminary)

#### 20 September

---

Flights to Riga:

- Billund - Riga (14:05 - 16:40; AirBaltic)
